

The EU is at a crossroads

We want it to take a new direction

Europe is at a crossroads, your Conservative MEPs are fighting for radical reforms leading to an in/out referendum.

We want:

- an end to “ever closer union”
- a red card to defend vital national interests
- redefinition of “free movement” of people to give full control of our borders and immigration policy
- to protect economic independence with exclusions from monetary union, fiscal union, banking union backed up with legal safeguards to protect the single market
- no EU taxes
- significant steps to roll back EU red tape; actions taken against countries which disregard single market rules; an end to gold plating
- full control of social and economic policy
- restore UK opt out from employment laws
- return of decision making regarding fisheries
- return of justice policy to national control
- downsizing of the EU institutions and the costs of the EU
- an end to EU meddling in defence
